

# Charging cable with connector T2 Mode 3 Case C, Straight, 6m

#### **General information**

| Part no.:          | E-3301-060B                            |
|--------------------|----------------------------------------|
| Type vehicle side  | Type 2, free conductor end, AC 1-phase |
| Specification/Norm | IEC 61851-1                            |

### Charging connctor and charging plug

| Arangement of phases           | 1p+N+PE and PP+CP                |
|--------------------------------|----------------------------------|
| Current                        | 32A                              |
| Current control contacts       | 2A                               |
| Rated operating voltage        | 200-250V                         |
| Rated operating voltage contro | 30V                              |
| Insulation voltage             | 500V                             |
| Mean time to failure MTTF      | >10 000 connections without load |

## Technical data sheet

#### Charging connctor and charging plug

| information of protection                                                                                                                                        | IP67/IPx9 not plugged in and without closure cap (in relation to the interior<br>of the housing with the exeption of external live parts) - IP54 overall test<br>with closure cap (including external live parts)                |

Minimum bending radius static Minimum bending radius dynamic

Handling

Standards charging cable

Incorrect use caused by torsional stress together with simultaneous expansion of cable should be avoided

ISO 4982-2, DIN EN 50363-10-2, DIN EN 50267-2-1, IEC 60228, DIN EN 50620, IEC 60332-1

Further cable lengths and individual colour adjustment on request.

Passing on to third parties only with the approval of Bals Elektrotechnik GmbH & Co. KG

Subject to technical modifications and typographical errors

Only valid at the time of printing. In case of recycling, check the current version.
